Letters From the People.

Mr. EDITOR:—A "Countyman" in your last issue expresses a desire to interview possible candidates for the next Legislature as to their views in regard to certain public questions. As my name will likely be placed before the democrats of the Eastern Shore for re nomination, I cheerfully avail myself of your open columns.

With reference to the candidate for United States Senator, I need only say that, if I am returned to the General Assembly, I shall support for that office the choice of the democratic party of the Eastern Shore, whoever that may be. "Countyman" may feel assured the party will make due deliverance on this and other important questions, and that its instructions will be faithfully carried out by party nominees. That this preference will be for Senator Daniel is a foregone conclusion; for I believe he is the choice of nineteen-twentieths of the democrats, not only of the Eastern Shore, but of the State.

Personally, I favor Senator Daniel; he is in every way the logical candidate; and it has never occurred to me to think of anyone else in connection with the office. I do not believe any other name will be presented to the caucus, nor perhaps even to the Assembly. At any rate, I believe my fellow-citizens who judge me by my past record will not hesitate to trust me to reflect the wishes of the party in this matter.

With reference to the late act in regard to exclusive original jurisdiction by justices of the peace in misdemeanor cases, I can only say, if the effect of the law is not salutary it should be repealed. That the bill was passed from the best and most laudable motives, no fair minded citizen will question who troubles to give the matter proper thought. And perhaps your readers will pardon me, if I refer briefly to these motives.

It is a fact that should be more generally known, that the criminal expenses of Virginia are not only a grievous burden to our taxpayers, but almost a disgrace to the statesmanship of the Commonwealth. This rather strong assertion is only borne out by palpable facts when the figures are considered, and especially when we compare the criminal expenses of our own county with those of other counties in the State. For example, while these expenses for Accomac, with a population of about 30,000, was, (1895), \$3,803, that of Smythe, for instance, with a population of one-half, was nearly equal; Tazewell, with a population of 20,000, was \$6,703; Scott, with a population of 22,000, was \$7,319. These counties are selected as examples of rural situations not embracing cities or even large towns, where the pro rata is often higher. In other words, the criminal expenses of the State aggregated in 1895, \$362,682.08. That the execution of criminal law in Virginia has been an expensive part of our State government, the tax payer who studies these figures will not deny.

There is another fact that is probably not as well known as it should be, viz: that we are actually confronting, in these hard times, a threatening necessity for an increase in our State tax rate. The late Assembly with these facts before it, attempted, I believe, to do its best for the people. A special committee was appointed on reductions of criminal and other State expenses, and to them such bills were referred as had any material bearing upon such legislation. The bill to which reference is made, as introduced provided for concurrent original jurisdiction, and in that shape, I believe, once passed the House; but in the judgment of the committee referred to, was amended and finally passed as it now stands. It is needless to say this committee was composed of some of the best lawyers and ablest legislators in the State, and that however its practical operation may have fallen short in the crucial test of experience, the object aimed at was the praise-worthy one of relieving the State of a part of its burden of excessive criminal expenses.

In Accomac, some embarrassment has apparently arisen in regard to a forcement of the local option law; an embarrassment which could not be foreseen at the time of the passage of the bill, but which, I believe has given rise to most of the dissatisfaction expressed with the law. It is hardly necessary to say, despite a popular error to the contrary, that it has apparently worked well in other sections. At any rate, its results are already apparent by a reduction in the aggregate of the State's criminal expenses to date.

Still, if the ends of justice are not being served by this new experiment, the act should be amended or repealed, and the citizen must pay his taxes without grumbling over burdens that cannot be lightened.

Respectfully yours,

Geo. W. LECATO.

EDITOR ENTERPRISE:—Being a candidate for re nomination by the democratic party to represent as floater delegate, the counties of Accomac and Northampton in the next General Assembly of Virginia, I take pleasure in complying with the suggestion of your correspondent, "Countyman," published in the last issue of the ENTERPRISE.

In the election contest for United States Senator, my personal preference would be Hon. John W. Daniel to succeed himself, and if again honored by his constituents, I would esteem it a great privilege to cast my vote as a representative, for that distinguished son of Virginia. The so-called "Misdemeanor Act" was passed by the late Legislature in an effort to reduce the criminal expenses of the State, but it seems to me that the act should be modified or amended, so that only certain specified cases should be tried by justices of the peace.

Thanking you in advance Mr. Editor for your courtesy in publishing this reply to "Countyman," I am Very respectfully,
CHAS. SMITH.
